# RMS Brings the Data and Dollars Back Together

## Automate complex, time-consuming remittance tasks so you can focus more on patient care.

RMS provides a unique suite of tools designed to simplify the entire revenue cycle. We're laser-focused on the healthcare industry, and we seamlessly integrate with all major billing and banking systems. Because our solution is fully configurable, you can purchase as much or as little as you need, but many of our clients find our tools so useful, they count on us to manage the entire revenue cycle from initial insurance claims submission through patient billing and payment.

**RMSWEB.COM**

rms
**EXPERTISE, ELECTRONIFIED**

**837 EDI**
HIPAA-compliant electronic files are fed into RMS

**RMS**

**Claims Submission**
RMS submits claims in the right format to thousands of insurers nationwide

A patient's visit to their healthcare provider initiates the remittance process

**HEALTHCARE BUSINESS OFFICE**

After the insurance payment or denial is recorded, RMS reconciles the data and dollars

- Image Archiving
- Correspondence Automation

$ = **RMS** + Bank

- Auto-Postable 835s and ERAs
- True Deposit Reconciliation

Current and archived data is searchable, enabling easy-to-understand analytics and reporting for faster, better decision-making

$ • Checks • EFTs

Upon approval or denial, insurers send money and/or data back to healthcare providers

• EOBs • ERAs • 835s

**INSURERS**

The healthcare provider dashboard delivers functional reporting that has been normalized across multiple systems to provide improved insights

**Billed**
If selected as a service option, the patient is billed via integrated RMS services

**RMS**

**Patient Billing & Payment**

$ **Paid**
When the patient's payment is received, it is automatically matched to other relevant data to close the loop

**PATIENTS**
